

DWA_03.5 Knowledge Check_DWA3.2

1. User story(ies) in Gherkin syntax for the "+" button.

Scenario Outline: User hovers over the "+" button and clicks on it

Given the user is on the Tally Count web page

When the user hovers over the button and clicks on it

Then the button should change color when hovered over, and animate a "press-down" movement and increments successfully until the maximum amount has been reached with each "click"

2. User story(ies) in Gherkin syntax for the "-" button.

Scenario Outline: User hovers over the "-" button and clicks on it

Given the user is on the Tally Count web page

When the user hovers over the button and clicks on it

Then the button should change color when hovered over, and animate a "press-down" movement and decrements successfully until the minimum amount has been reached with each "click"
